# Introduction

*The scientist is wiser not to withhold a single finding  
or a single conjecture from publicity.*

–Goethe

Without the publication or presentation of its research, the breadth and depth of the work accomplished by ARL's technical staff would mean little. We are happy to report that ARL's staff have been *wise* in the way Goethe wrote that scientists should be. They have publicly presented their work and shared it where possible with the broader research community. In addition, through its partnerships, ARL has leveraged the expertise and resources of universities and the commercial sector made available through FedLab. At the same time, its scientists and engineers have conducted and reported on their research in fields of interest to the Army and shared their knowledge with their professional peers.

Under the Partners in Education program, various ARL sites have established programs with local schools and colleges, and we now have 42 Education Partnership Agreements. Through the Domestic Technology Transfer program, ARL encourages its research teams to establish technology transfer agreements and partnerships with outside organizations. During fiscal year 1998, the lab signed 14 new Cooperative Research and Development Agreements (CRDAs) and 2 new Patent License Agreements (PLAs). The Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) programs are aimed at firms with fewer than 500 employees. ARL awarded 30 new Phase I and 14 new Phase II SBIR contracts in fiscal year 1998.

These activities generate mutual benefits by improving youth education, especially in science and math; stimulating technological innovation; sharing technological advances by *spinning off* Army developments or *spinning on* concepts from the private sector; strengthening the role of small business in meeting Army research and development requirements; encouraging participation by minorities and disadvantaged persons; building up and exploiting research assets at universities across the country; and increasing the commercial application of Army-sponsored research and development results.

Additional information on ARL is available on the World Wide Web at the ARL homepage: [www.arl.mil](http://www.arl.mil). For additional information on small business solicitations, visit the DoD's SBIR and STTR website at [www.acq.osd.mil/sadbu/sbir/](http://www.acq.osd.mil/sadbu/sbir/).

Automated Coherent Clock Synthesis for Matrix Display

Yue Tong David Chiu, and Richard P. Tuttle  
5,675,355 7 October 1997

Impact Absorbing Soles for Parachutists

Jim A. Faughn and Harrison P. Crowell  
5,675,915 14 October 1997

SiON Low Dielectric Nanocomposite

Gary Gilde, Parimal Patel, Joe Wells, Clifford Hubbard, Thomas Hynes, William Croft, and Brian Pothier  
5,677,252 14 October 1997

Closed Loop Battery Life Extender

Louis P. Jarvis, Anthony Pellegrino, Joseph Francis DiCarlo, William Patrick Keane, and Carl J. Campagnuolo  
5,677,612 14 October 1997

Temperature Calibration System for a Ferroelectric Phase-Shifting Array Antenna

Dale M. Didomenico, Thomas E. Koscica, and William C. Drach  
5,680,141 21 October 1997

Natural Computing System

Somayajula Karamchetty  
5,680,557 21 October 1997

Method for Fabricating Composite Structures Using Continuous Press Forming

Gary Farley  
5,681,513 28 October 1997

Motion and Sound Monitor and Stimulator

Michael V. Scanlon  
5,684,460 4 November 1997

High Sensitivity Temperature Sensor and Sensor Array

John R. Vig  
5,686,779 11 November 1997

Infrared Sniper Detection Enhancement

David B. Hillis  
5,686,889 11 November 1997

An Apparatus for Estimating the Cognitive Decision Made in Response to a Known Stimulus from the Corresponding Single-Event: Evoked Cerebral Potential and Method Therefore

Christopher Smyth  
5,687,291 11 November 1997

Eyetracker Control of Heads-Up Displays

Christopher Smyth  
5,689,619 18 November 1997

C-Axis Oriented High-Temperature Superconductors Deposited Onto New Compositions of Garnet

Arthur Tauber and Steven C. Tidrow  
5,691,279 25 November 1997

Detecting Targets Imaged on a Large Film Screen

Gordon L. Herald  
5,690,492 25 November 1997

Long Range Nonlethal Bullet

Raine M. Gilbert  
5,691,501 25 November 1997

Electronically Graded Multilayer Ferroelectric Composites

Louise C. Sengupta, Eric Ngo, Michelina O'Day, Steven C. Stowell, Robert Lancto, Somnath Sengupta, and Thomas Hynes  
5,693,429 2 December 1997

Method for Detrapping Light in Thin-Film Phosphor Displays

Arthur Ballato and David C. Morton  
5,698,940 16 December 1997

Circuit Scanning Device and Method

Richard G. Sartore  
5,703,361 30 December 1997

Permanent Magnet Ring Separator

Herbert A. Leupold  
5,705,064 6 January 1998

A Sensitive Device and Process for Detection of Nitro Compounds Employing Excimer Laser Radiation

Josef Simeonsson, et al

5,728,584 17 March 1998

Recognition Tag for Use in a System for Identifying Distant Items

William J. Skudera, Jr.

5,734,326 31 March 1998

Butterfly Actuated Quick Coupling Connector Valve

Jim A. Faughn

5,738,143 14 April 1998

Ultra-Wideband Photonic Band Gap Crystal Having Selectable and Controllable Band Gaps and Methods for Achieving Photonic Band Gaps

Louis J. Jasper, Jr., Lawrence Carin, and K. Ming Leung

5,739,796 14 April 1998

Kinetic Energy Projectile With Fin Leading Edge Protection Mechanisms

Ameer G. Mikhail

5,744,748 28 April 1998

Chemical and Biological Sensor Based on Microresonators

John R. Vig

5,744,902 28 April 1998

Built-In Self Testing for the Identification of Faulty Integrated Circuit Chips in a Multichip Module

Thyagaraju Damarla, Moon J. Chung, Wei Su, and Gerald T. Michael

5,745,500 28 April 1998

Infrared/Optical Imaging Techniques Using Anisotropically Strained Doped Quantum-Well Structures

Paul H. Shen, Mitra Dutta, Michael Wraback, and Jagadeesh Pamulapati

5,748,359 5 May 1998

Optical Turbulence Characterizer and Simulator

Wendell R. Watkins, Fernando R. Palacios,

Daniel Billingsley, and Jay B. Jordan

5,756,990 26 May 1998

A Sensor for Detecting Trace Underground Energetic Materials

Rosario C. Sausa

5,759,859 2 June 1998

Holographic Microscope for Phase Imaging

Philip S. Brody

5,760,902 2 June 1998

Drag Control Module for Stabilized Projectiles

Michael Hollis and Fred J. Brandon

5,762,291 9 June 1998

Fast High-Signal-to-Noise Ratio ET (Equivalent Time) Processor for Use With Transient Digitizers

John W. McCorkle

5,764,551 9 June 1998

Novel Thin Film Composite of BSto-MgO Based Compounds

Louise C. Sengupta and Somnath Sengupta

5,766,697 16 June 1998

Method for Making Monolithically Integrated Signal Processing Circuit Having Active and Passive Components

Weimin Zhou, Paul H. Shen, Mitra Dutta, and Jagadeesh Pamulapati

5,770,472 23 June 1998

Ultrafast, High Voltage Pulser Using Circumferentially Illuminated, Laser-Switched Radial Transmission Line

Lawrence E. Kingsley, Maurice Weiner, Hardev Singh, and William R. Donaldson

5,773,817 30 June 1998

Guided Artillery Projectile and Method

John R. Vig and Steven W. Waugh
